PROJECTS

Online Shopping Website
Developed a simple online store using web technologies.
Designed product pages, navigation, and contact form.
Focused on clean layout and user-friendly interface.
Demonstrated ability to create structured and functional websites.

Genetic Algorithm Project
Implemented a Python Genetic Algorithm for optimization, applying selection, crossover, and mutation to efficiently solve complex problems, showcasing programming and algorithmic skills.

System Hotel
It was done by C++ There is a tool for dividing rooms, booking rooms, guest data, and knowing that it directs rooms that do not have guests or not.

SKILLS

Programming Languages:
Python, C++, JavaScript,HTML,CSS

Soft Skills
Problem Solving, Analytical Thinking, Attention to Detail, Team Collaboration, Time Management

Cybersecurity Tools
SIEM (e.g., Splunk), Wireshark, Kali Linux, Incident Response, Threat Hunting, Log Analysis
